

CPSC 121,  
2007/8 Winter Term 2  
Sample Quiz 1

Name: \_\_\_\_\_

Student ID: \_\_\_\_\_

Signature: \_\_\_\_\_

- You have **15 minutes** to write the **3 questions** on this examination.
- A total of 18 marks are available. **You may want to complete what you consider to be the easiest questions first!**
- Justify all of your answers.
- No notes or electronic equipment are allowed.
- Keep your answers short. If you run out of space for a question, you have written too much.
- The number in square brackets to the left of the question number indicates the number of marks allocated to that question.
- Good luck!

**UNIVERSITY REGULATIONS:**

- Each candidate should be prepared to produce, upon request, his/her university-issued ID.
- No candidate shall be permitted to enter the examination room after the expiration of one half hour or to leave during the first half hour of the examination.
- **CAUTION:** candidates guilty of any of the following, or similar, dishonest practices shall be immediately dismissed from the examination and shall be liable to disciplinary action.
  1. Having at the place of writing, or making use of, any books, papers or memoranda, electronic equipment, or other memory aid or communication devices, other than those authorised by the examiners.
  2. Speaking or communicating with other candidates.
  3. Purposely exposing written papers to the view of other candidates. The plea of accident or forgetfulness shall not be received.
- Candidates must not destroy or mutilate any examination material; must hand in all examination papers; and must not take any examination material from the examination room without permission of the invigilator.

1.

- (a) One of the following compound propositions is a tautology. Circle the tautology and prove that it is a tautology. [3 marks]

$(q \wedge (\sim p \rightarrow q)) \rightarrow q$	$p \rightarrow ((q \vee r) \wedge p)$
---	---------------------------------------

- (b) The following compound proposition is logically equivalent to one of the compound propositions from part a. Which one is it logically equivalent to? Prove that the two compound propositions are logically equivalent using the logical equivalences. [3 marks]

$$(\sim p \vee q) \vee (p \wedge r)$$

(c) Write a proposition that is equivalent to the following circuit. Try to express the proposition as closely to the existing circuit as possible. You should **not** simplify the proposition! [2 marks]

2. There are three erroneous steps in the following proof. Identify all three incorrect steps and correct the errors. If an error cannot be corrected, briefly explain what is wrong with the step. (The errors are **not** in the premises!) [5 marks]

- |      |                            |                           |
|------|----------------------------|---------------------------|
| (1)  | $\sim p \vee r$            | premise                   |
| (2)  | $q$                        | premise                   |
| (3)  | $\sim r \vee s$            | premise                   |
| (4)  | $p \rightarrow q$          | premise                   |
| (5)  | $s \rightarrow m \wedge n$ | premise                   |
| (6)  | $p \rightarrow r$          | def'n of conditional, (1) |
| (7)  | $q \rightarrow r$          | hyp syll, (4), (6)        |
| (8)  | $r$                        | modus ponens, (4), (7)    |
| (9)  | $s$                        | dis syll, (3), (8)        |
| (10) | $m$                        | modus ponens, (5), (9)    |

3. Translate the following statement into propositional logic. Be sure to define each proposition you use! (For brevity, you can define a proposition by circling its text in the statement and labelling it with a letter.) [5 marks]

Either the file is opened correctly, or an exception is thrown, but not both.

Rule of inference	Name
$\frac{p}{\therefore p \vee q}$	Addition
$\frac{p \quad q}{\therefore p \wedge q}$	Conjunction
$\frac{p \wedge q}{\therefore p}$	Simplification
$\frac{p \quad p \rightarrow q}{\therefore q}$	Modus ponens
$\frac{\sim q \quad p \rightarrow q}{\therefore \sim p}$	Modus tollens
$\frac{p \rightarrow q \quad q \rightarrow r}{\therefore p \rightarrow r}$	Hypothetical syllogism
$\frac{p \vee q \quad \sim p}{\therefore q}$	Disjunctive syllogism

Law Name	Equivalences
Identity	$p \wedge T \equiv p$ $p \vee F \equiv p$
Domination	$p \wedge F \equiv F$ $p \vee T \equiv T$
Distributive	$p \wedge (q \vee r) \equiv (p \wedge q) \vee (p \wedge r)$ $p \vee (q \wedge r) \equiv (p \vee q) \wedge (p \vee r)$
Absorbtion	$p \vee (p \wedge q) \equiv p$ $p \wedge (p \vee q) \equiv p$
Negation	$p \wedge \sim p \equiv F$ $p \vee \sim p \equiv T$
De Morgan's	$\sim(p \wedge q) \equiv (\sim p) \vee (\sim q)$ $\sim(p \vee q) \equiv (\sim p) \wedge (\sim q)$
Definition of conditional	$p \rightarrow q \equiv \sim p \vee q$
Contrapositive	$p \rightarrow q \equiv \sim q \rightarrow \sim p$
